

## Topic: Print Triangle

You must design a program to print a triangle pattern formed of stars. The number of rows in your triangle will be determined based on a number (n) that your program takes in.

For example:

Input: 5

Output:

```
*  
* *  
* * *  
* * * *  
* * * * *
```

**Finish early?** Turn your triangle into a pyramid.
